# BharatMold Components Pvt. Ltd.

Pune, Maharashtra · PRECISION TOOLING · PREMIUM FINISH

All supplier names, locations, prices, experience claims, and offers in this document are invented for classroom learning. They do not represent actual companies or real commercial offers.

## Product & requirement

Pravaah P1 is a fictional small hatchback created only for this classroom exercise. The buyer requests a four-piece, black, molded TPE cabin floor-mat set (two front and two rear mats), compatible with a buyer-supplied floor template and retention-point sample. The set should have an anti-slip underside, a raised edge, a reinforced driver's heel zone, no sharp edges, and no interference with pedals or seat movement. Supplier fitment and material claims are illustrative and require buyer validation.

## Product and process proposal

TPE compound, nominal 3.5 mm working section, charcoal black, textured anti-slip underside, 10 mm raised perimeter, reinforced driver's heel pad, and molded location windows for the supplied retention points. First articles will be checked against the buyer's template; the supplier asks for digital surface data and one physical cabin sample before tooling release.

## Tooling and fitment plan

New aluminium prototype tool followed by a production mould after fitment sign-off. Tool design review in week 1, first articles in week 4, correction window in week 5. Tool ownership transfers to the buyer after full payment; storage and annual maintenance are included for year one.

## Commercial quotation

| Item | Offer |
|---|---|
| Product | 4-piece TPE floor-mat set for Pravaah P1 |
| Unit price | INR 1,185 per set, before GST |
| One-time tooling | INR 6,50,000 |
| First sample / pilot lead | 30 calendar days after drawing and sample approval |
| Monthly capacity | 12,000 sets/month |

Payment, GST and freight assumptions: 50% tooling advance, balance after first-article approval. Product payment net 30 days. GST extra at applicable rate; freight to Pune buyer warehouse estimated at INR 42/set and charged at actuals.

## Quality controls and compliance evidence

BharatMold proposes incoming compound identification, first-piece approval, a 12-point fitment checklist, dimensional checks on 5 sets per shift, and batch-level traceability. A first-article inspection report is included before pilot dispatch. Material odour and abrasion checks are described as internal checks; independent test reports are not attached. Nonconforming lots are quarantined pending buyer disposition.

## Delivery and capacity

The requested planning case is a 20-set fitment sample, followed by a 200-set pilot, then an indicative 10,000 sets/year. Forecast volumes are non-binding until purchase order release. Supplier-stated monthly capacity is 12,000 sets/month. The quoted lead time is 30 calendar days after drawing and sample approval. Buyer approval is required before production release.

## Warranty and supplier support

12 months from dispatch against manufacturing defects. Acknowledgement within 1 business day and containment plan within 3 business days. Replacement parts shipped with the next weekly dispatch.

## Company experience

The fictional company profile describes 14 years in molded automotive interior trim, including mats and console liners. Named quality and tooling contacts are provided in the quotation; reference visits can be arranged after shortlisting.

## Open points for negotiation

Before award, buyer and supplier should sign off the fitment template, compound grade, thickness tolerance, retention features, packaging, final freight location, GST treatment, acceptance sampling, warranty start date, tool custody, and approved sample. No claim in this fictional quotation has been audited or independently verified.

## Quote validity

This synthetic offer is valid for 60 days from 18 October 2026 for comparison practice only. Actual commercial terms would require a formal purchase order and contract.
