Deccan Polymer Works

Chennai, Tamil Nadu · LOWEST UNIT PRICE · QUICK START

All supplier names, locations, prices, experience claims, and offers in this document are invented for classroom learning. They do not represent actual companies or real commercial offers.

Product & requirement

Pravaah P1 is a fictional small hatchback created only for this classroom exercise. The buyer requests a four-piece, black, molded TPE cabin floor-mat set (two front and two rear mats), compatible with a buyer-supplied floor template and retention-point sample. The set should have an anti-slip underside, a raised edge, a reinforced driver's heel zone, no sharp edges, and no interference with pedals or seat movement. Supplier fitment and material claims are illustrative and require buyer validation.

Product and process proposal

Reprocessed-content TPE blend, nominal 2.5 mm thickness, basic pebble texture, 8 mm edge lip, and a stitched heel patch. Retention cut-outs will follow the template. The compound grade, recycled-content percentage, odour test method, and dimensional tolerance are not specified in this offer.

Tooling and fitment plan

One soft production mould is proposed from the supplied template. A fit sample is targeted in 10 working days; one minor correction is included. Additional design changes may incur charges. Tool custody remains with Deccan unless separately negotiated.

Commercial quotation

Item	Offer
Product	4-piece TPE floor-mat set for Pravaah P1
Unit price	INR 790 per set, before GST
One-time tooling	INR 2,50,000
First sample / pilot lead	14 calendar days to first sample; 18 days to pilot
Monthly capacity	7,000 sets/month

Payment, GST and freight assumptions: 30% tooling advance and balance before dispatch. Product payment 50% with order, 50% before dispatch. GST extra; delivery freight quoted separately once the buyer location is confirmed.

Quality controls and compliance evidence

Operators will visually inspect edges and confirm fit on one sample vehicle before pilot production. The proposal does not include a written control plan, lot traceability format, material certificate, or defined inspection frequency. The supplier will discuss a defect limit after the first sample review.

Delivery and capacity

The requested planning case is a 20-set fitment sample, followed by a 200-set pilot, then an indicative 10,000 sets/year. Forecast volumes are non-binding until purchase order release. Supplier-stated monthly capacity is 7,000 sets/month. The quoted lead time is 14 calendar days to first sample; 18 days to pilot. Buyer approval is required before production release.

Warranty and supplier support

6 months against visible manufacturing defects. Claims should include photographs and batch label. Replacement timing and freight responsibility are not committed in the offer.

Company experience

The fictional supplier describes small-batch polymer moulding for aftermarket accessories and three years of automotive trim work. No OEM references or formal automotive quality certification are included.

Open points for negotiation

Before award, buyer and supplier should sign off the fitment template, compound grade, thickness tolerance, retention features, packaging, final freight location, GST treatment, acceptance sampling, warranty start date, tool custody, and approved sample. No claim in this fictional quotation has been audited or independently verified.

Quote validity

This synthetic offer is valid for 60 days from 18 October 2026 for comparison practice only. Actual commercial terms would require a formal purchase order and contract.
